How to add image map

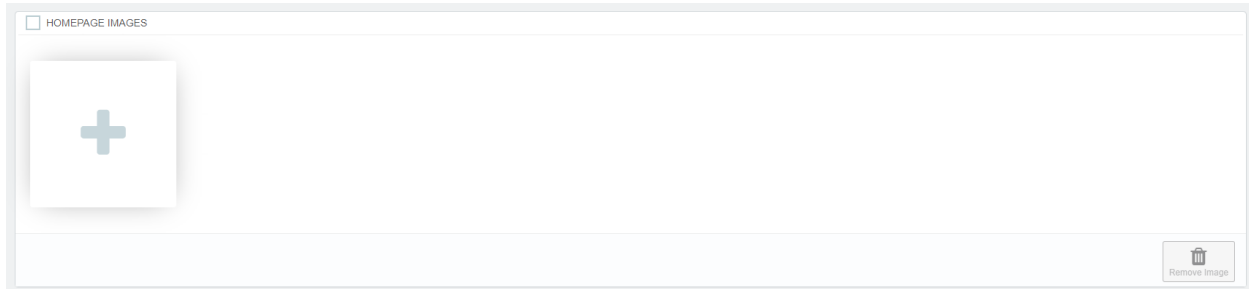

Figure 1.1

1. Simply click the 'plus sign' button (*see figure 1.1*) to add the image you want to map.
2. After selecting the image, it will automatically uploaded and display.
3. Please note, the image you select is not yet displayed in the front, you have to configure it to works.

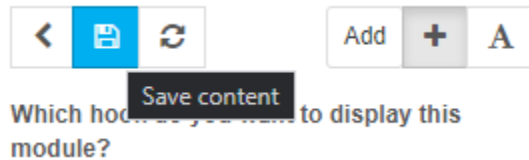

Configuration

1. Hover the image you want to configure and then click the edit button (*pencil icon, see figure 1.2*).

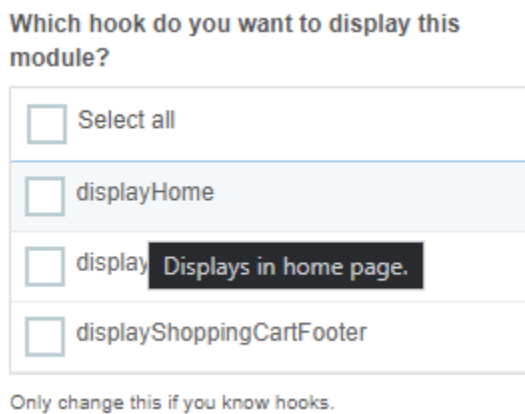

Figure 1.2

2. It will open the image configuration display and here you can add, edit or even configure where to hooks.
3. To configure, use the tools (*located in right*). To understand better each tool, just hover each one and a popup appear with informative description.

4. It is necessary to understand hooks, especially where to place the image. So I provide an informative tooltip each hook to help you decide. Just hover in it.

5. That's it! If you find yourself in trouble just reload the page and try again.
